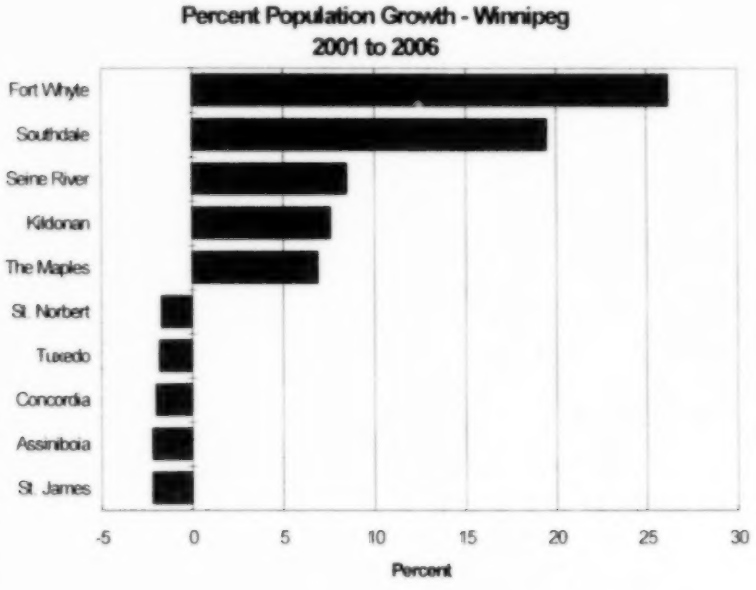
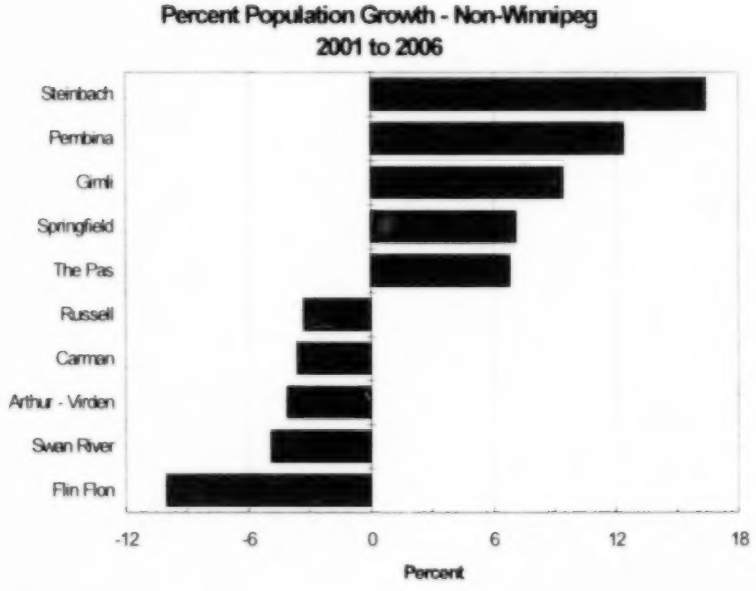
2006 Census Facts: *Provincial Electoral Divisions*

Manitoba's census count increased by 28,818 persons or 2.6%, from 1,119,583 persons in 2001, to 1,148,401 persons in 2006. Winnipeg increased by 13,907 persons (2.2%), while the area outside Winnipeg increased by 3.0% or 14,911 persons. The average increase for the 31 Winnipeg divisions was 449 persons, while the average for the 26 Non-Winnipeg divisions was 574 persons.

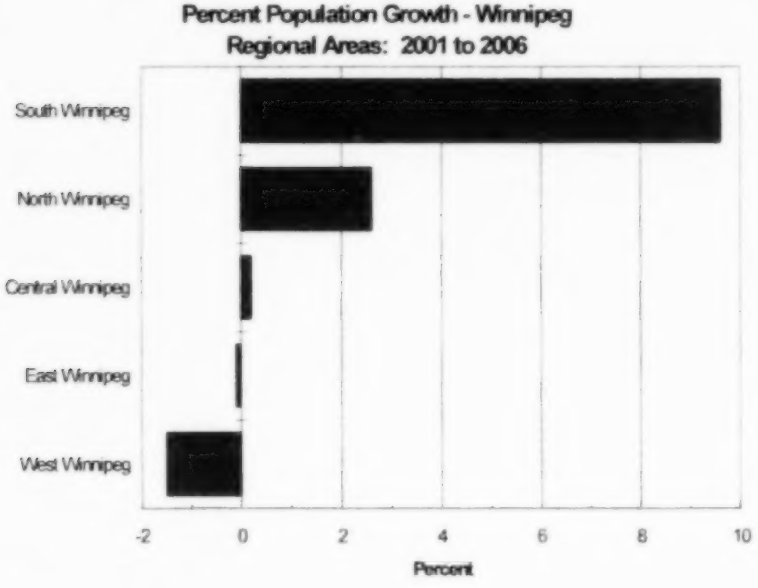


Within Winnipeg, there were two Provincial Electoral Divisions that had over 10.0% growth. Fort Whyte had the largest growth with 26.2%, while Southdale (19.5%) and Seine River (8.5%) also experienced large growth. Kildonan and The Maples, with 7.6% and 6.9% growth respectively, experienced moderate growth. The largest decline occurred in St. James and Assiniboia with 2.2%. Concordia, Tuxedo and St. Norbert had declines of 2.0%, 1.8% and 1.7% respectively. The rest of the city ranged in growth from 4.1% in Point Douglas to a 1.3% decline in Wellington.



Outside Winnipeg, there were also two Provincial Electoral Divisions that had over 10.0% growth. Steinbach had the highest growth at 16.4%. Pembina, Gimli, Springfield and The Pas, with 12.4%, 9.4%, 7.1% and 6.8% growth respectively, experienced moderate growth. The largest decrease in census count was 10.0% in Flin Flon. Swan River (4.9%), Arthur-Virden (4.1%), Thompson (5.4%), Carman (3.6%) and Russell (3.3%) followed with the next largest decreases. The other divisions ranged from a 6.3% increase in Morris to a 3.1% decrease in Turtle Mountain.

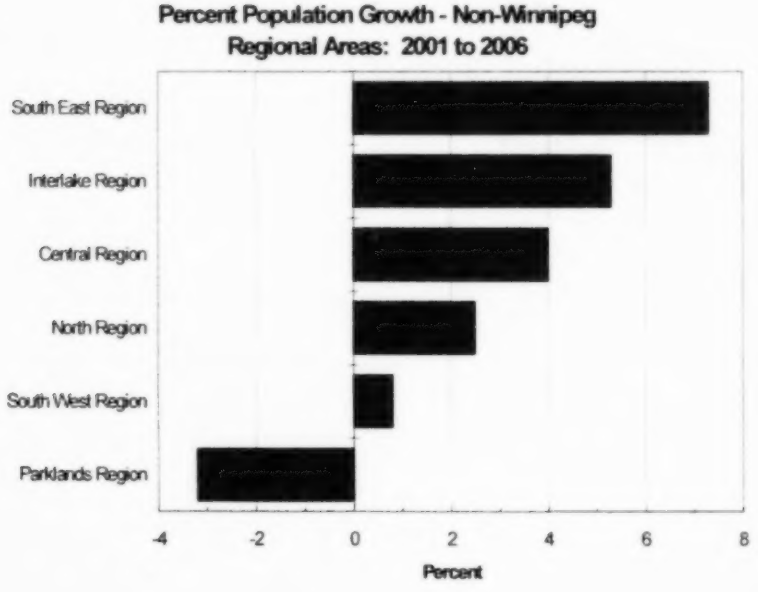
The southern parts of Winnipeg and those parts to the south-east of Winnipeg showed the largest growth. The Non-Winnipeg area that showed the only decrease was the Parklands region. Within Winnipeg, the decreases were in the East and West areas.



South Winnipeg, comprised of Fort Garry, Fort Whyte, Riel, Seine River, Southdale and St. Norbert, experienced considerable growth from 2001 to 2006. An increase from 124,135 persons in 2001 to 136,031 persons in 2006 resulted in an increase of 11,896 persons, or 9.6%.

West Winnipeg (Assiniboia, Charleswood, Kirkfield Park, St. James and Tuxedo) decreased by 1,531 persons (1.5%).

The remainder of the city ranged from an increase of 2.6% in the North, to a 0.1% decrease in the East.



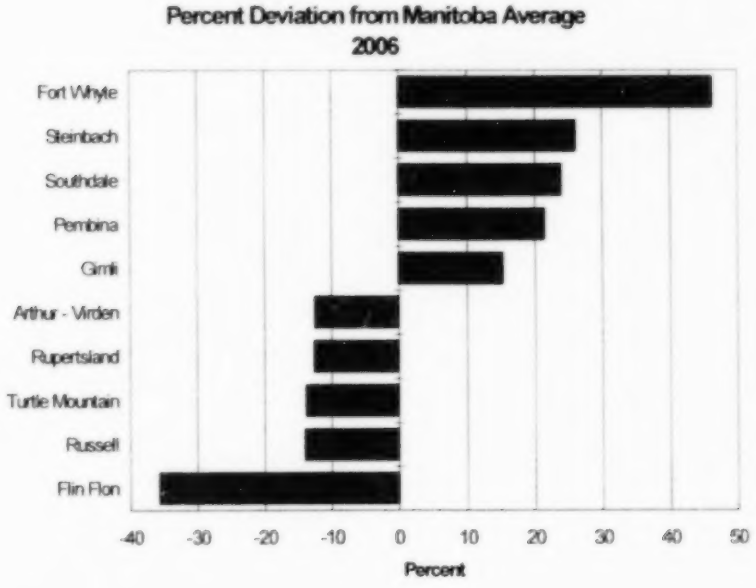
Outside Winnipeg, the South East Region of the province, Emerson, La Verendrye, Lac Du Bonnet, Springfield and Steinbach, increased from 102,177 persons in 2001 to 109,628 persons in 2006. This represented the largest increase at 7,451 persons, or 7.3%.

The Interlake (5.3%) and Central (4.0%) Regions showed modest growth. The North and South West Regions showed increases of 2.5% and 0.8%, respectively.

The Parklands Region (Dauphin-Roblin, Russell, Ste. Rose and Swan River) decreased by 2,433 persons (3.2%) from 74,919 persons in 2001 to 72,486 persons in 2006. Swan River decreased more so than other parts of the region.

2006 Census Facts: *Provincial Electoral Divisions*

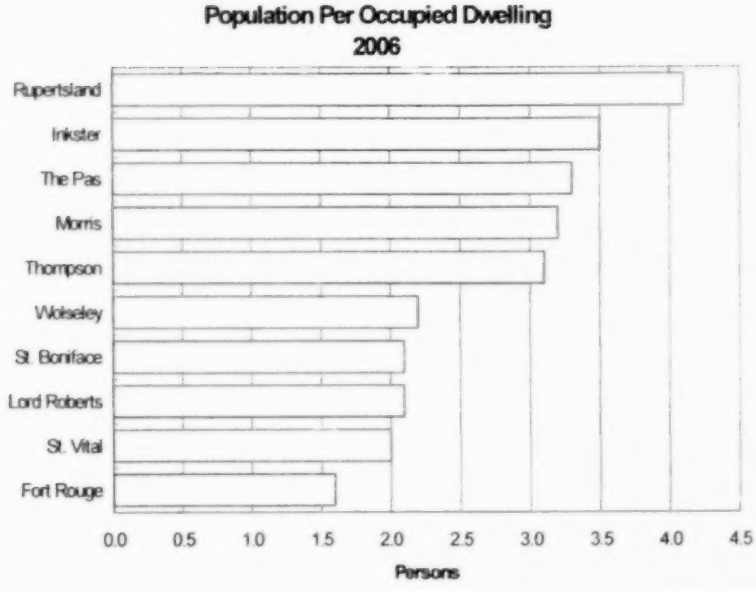
One of the reasons for dividing the province into Provincial Electoral Divisions is to ensure that the population is getting represented evenly. As such, deviations from the Manitoba average are quite important, and large deviations may indicate that a change of boundary is needed.



In 2006, with a value of 46.3%, the largest deviation from the provincial average was in Fort Whyte. Steinbach, Southdale and Pembina showed high deviations as well with 26.1%, 24.0% and 21.5% respectively. A Moderate deviation was also noted in Gimli (15.3%).

The largest negative deviations were all outside Winnipeg. Flin Flon (35.7%) had a deviation over 30.0%. Russell (14.0%), Turtle Mountain (13.8%), Rupertsland (12.6%) and Arthur-Virden (12.5%) had moderate negative deviations.

The rest of the Provincial Electoral Divisions ranged from a positive 14.6% in Seine River, to a negative 10.7% in both Swan River and Carman.



Rupertsland had the highest population per occupied dwelling in 2006 with 4.1 persons. Inkster (3.5%), The Pas (3.3%), Morris (3.2%), Thompson (3.1%), Fort Whyte (3.1%), Steinbach (3.0%) and La Verendrye (3.0%) all had 3.0 persons per occupied dwelling and over.

There were two areas where the number of persons per occupied dwelling was 2.0 or less. Fort Rouge had the lowest with 1.6 persons. St. Vital had 2.0 persons per occupied dwelling in 2006.

The provincial average was 2.6 persons per dwelling.

2006 Census Facts: *Provincial Electoral Divisions*

The following tables show various population characteristics by Provincial Electoral Division for the Winnipeg area and the rest of Manitoba. The first set shows the Census Counts for 2001 and 2006, as well as the growth and deviations from average. To provide another perspective on the data, tables grouping Provincial Electoral Divisions together into regions have been prepared. These tables show additional information on Dwelling counts and Population Per Occupied Dwelling for 2006. The last table encompasses all of Manitoba and is arranged according to Population size in 2006, while allowing for comparability by showing the 2001 rank.

Note to Users:

Boundaries

It is important to note that the 2001 and 2006 data are not strictly comparable. The 2001 numbers were compiled using Statistics Canada's Census Blocks, a new geographic level for 2001. Although similar to the Block Faces and EA's used in 1996, they do not always correspond exactly to the official boundaries. The 2006 numbers were compiled using Statistics Canada's Dissemination Blocks, a new geographic level for 2006. Although similar to the Census Blocks used in 2001, they do not always correspond exactly to the same boundaries. Both the 2001 and 2006 figures are un-rounded.

Census Count

It also must be noted that the values used in this report are Census Counts only. They do not include the net census undercount. As such these figures may not accurately represent the actual changes taking place. Over the next 18 months, Statistics Canada will be preparing estimates of the number of people missed by the Census. These under-coverage estimates will then be added to the Census counts to determine the population estimates based on the 2006 Census.

Note: The 2001 and 2006 data are not strictly comparable.
The 2001 numbers were compiled using Statistics Canada's Census Blocks, a new geographic level for 2001. Although similar to the Block Faces and EA's used in 1996, they do not always correspond exactly to the official boundaries. The 2001 figures are un-rounded.
The 2006 numbers were compiled using Statistics Canada's Dissemination Blocks, a new geographic level for 2006. Although similar to the Census Blocks used in 2001, they do not

Note: The 2001 and 2006 data are not strictly comparable.
The 2001 numbers were compiled using Statistics Canada's Census Blocks, a new geographic level for 2001. Although similar to the Block Faces and EA's used in 1996, they do not always correspond exactly to the official boundaries. The 2001 figures are un-rounded.
The 2006 numbers were compiled using Statistics Canada's Dissemination Blocks, a new geographic level for 2006. Although similar to the Census Blocks used in 2001, they do not always correspond exactly to the same boundaries. The 2006 figures are un-rounded.

Note: The 2001 and 2006 data are not strictly comparable.
The 2001 numbers were compiled using Statistics Canada's Census Blocks, a new geographic level for 2001. Although similar to the Block Faces and EA's used in 1996, they do not always correspond exactly to the official boundaries. The 2001 figures are un-rounded.
The 2006 numbers were compiled using Statistics Canada's Dissemination Blocks, a new geographic level for 2006. Although similar to the Census Blocks used in 2001, they do not always correspond exactly to the same boundaries. The 2006 figures are un-rounded.

Note: The 2001 and 2006 data are not strictly comparable.
The 2001 numbers were compiled using Statistics Canada's Census Blocks, a new geographic level for 2001. Although similar to the Block Faces and EA's used in 1996, they do not always correspond exactly to the official boundaries. The 2001 figures are un-rounded.
The 2006 numbers were compiled using Statistics Canada's Dissemination Blocks, a new geographic level for 2006. Although similar to the Census Blocks used in 2001, they do not always correspond exactly to the same boundaries. The 2006 figures are un-rounded.
